

# 3-IN-1 PLOW

Imagine the Convenience  
& Savings of  
Three Plows in One

**844.BLU.PLOW**  
(844.258.7569)

[www.danielsplows.com](http://www.danielsplows.com)

## Standard Plow Features

- Hydro-turn up to 35 degrees left and right
- Double acting hydraulic cylinders
- Hydraulic manifold with integrated cushion valve
- Electric three position switch for angling and independent wing pivot control
- Full Moldboard Trip

### SAY YES TO THE 3-IN-1!

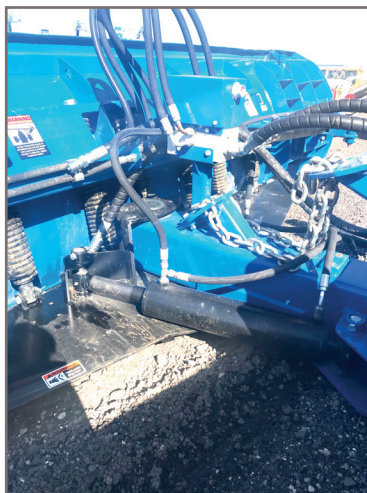

1. Flick of a switch from inside the cab!
2. Full hydraulic plow transforms from a Straight Blade to a Box Plow and any shape in between
3. Each wing controlled separately
4. Entire plow hydroturns 35 degrees in either direction in all positions
5. Offers an unlimited combination of shapes that best match snow and surface conditions

### SAY NO TO INCONVENIENCE

- NO more returning to the shop to swap out plows
- NO more trying to make a Straight Blade do the work of a Box Plow
- NO more loss of maneuverability when pushing as a box

## 3-IN-1 Plow Specifications

Model Number	3116	3118	3120	3122
Plow Width - Open	16'	18'	20'	22'
Center Section	10'	12'	12'	12'
Wing (independently pivoting wings adjustable from straight to box plow)	3'	3'	4'	5'
Box Width (Inside dimension with wings turned forward)	10'	12'	12'	12'
When Hydroturned *In Straight Position	14'	14'-9"	16'-5"	18'
Moldboard Height	42"	42"	42"	42"
Moldboard Material	10 Gauge	10 Gauge	10 Gauge	10 Gauge
Reinforcement Material	5/16" Min.	5/16" Min.	5/16" Min.	5/16" Min.
Trip Springs	8	8	10	12
Weight (lbs.)	4100	4400	4700	5000
Cutting Edge	3/4"x8"	3/4"x8"	3/4"x8"	3/4"x8"

The Daniels 3-in-1 Plow utilizes the hydraulics from your loader's 3rd valve. By connecting the loader's 3rd valve lines to the 3-in-1, the hydraulic manifold allows the 3-in-1 Plow to angle left and right 35° and pivot the wings to the degree needed.

Relief is built into the hydraulic manifold to relieve pressure to the 3-in-1 Plow as it angles when an obstruction is met. Electric switch is supplied with the 3-in-1 Plow with three positions to control the angling of the plow and each wing at any degree independently.
